

6516209451.txt

Anyone who has tried to get up to the minute traffic or weather reports on radio or t.v. knows the frustration of hit or miss searching from one station to another only to get a report that is often far from up to the minute.

XM's reports have proven to be very precise and timely. It also seems to me that limiting their right to broadcast these reports is a serious infringement on their first amendment rights. Please reject the NAB's petition 04-160.

Thank you for your time.
